**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in view of canceling non-elected claims:

**IN THE CLAIMS:**

Claims 1-10 and 19-34 are canceled.

2. Applicant's election of Group II (claims 11-18 and 35-41) in the response filed on 12/22/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP 818.03(a)).
3. This application is in condition for allowance except for the presence of claims 1-10 and 19-34 to species non-elected without traverse. Accordingly, claims 1-10 and 19-34 have been canceled.

***Allowable Subject Matter***

4. Claims 11-18 and 35-41 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or make obvious a device or a method for detecting the edge of a recording material (i.e. printing plate) in an exposer for recording printing originals

Art Unit: 2878

comprising, in addition to the other recited features of the claim, an optical fiber disposed at a surface of an exposure drum and having at least one end, a light source disposed at the end of the optical fiber and radiating light axially into the optical fiber and an optical detector receiving light emitted radially by the optical fiber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blohdorn et al (6,915,743) is cited for disclosing a device for detecting the edge of a recording material comprising a sensing finger device. Kiermeier et al (6,815,702) is cited for disclosing a device for detecting the edge of a printing plate using a groove formed in an exposure drum wherein an amount of light reflection from the drum is changed in view of a groove. Smythies et al (US 2004/0231543) is cited for disclosing a device for detecting the edge of an image media.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Pyo whose telephone number is (571) 272-2445. The examiner can normally be reached on Mon-Fri (with flexible hour), First Mon. off.
